**Why study Biology?**
"Pursuing a career in biology can be immensely rewarding and exciting. Studying biology teaches us to ask questions, make observations, evaluate evidence, and solve problems. Biologists learn how living things work, how they interact with one another, and how they evolve. They may study cells under a microscope, insects in a rainforest, viruses that affect human beings, plants in a greenhouse, or lions in the African grasslands. Their work increases our understanding about the natural world in which we live and helps us address issues of personal well-being and worldwide concern, such as environmental depletion, threats to human health, and maintaining viable and abundant food supplies."

**Who should minor in Biology?**
The minor in Biology offers students a coherent program of study and training in the biological sciences. It provides exposure to the fundamental principles of biology, including studies of the structure, organization, and diversity of life. The minor is well-suited for students who wish to pursue a career that requires an understanding and appreciation of the life sciences, though it is not intended for students interested in graduate work in biology. **Exclusions:** Students who elect a minor in Biology may not elect the following majors: Biology; General Biology; Plant Biology; Ecology and Evolutionary Biology; Ecology, Evolution, and Biodiversity; Cellular and Molecular Biology; CMB:BME; Microbiology; Neuroscience; or Biochemistry. They also may not elect a minor in Plant Biology or Ecology and Evolutionary Biology.

**How do I declare?**
Students interested in any major or minor in the biological sciences are encouraged to meet with an advisor to discuss their academic plans as soon as possible! Students should have completed the biology introductory sequence with a 2.0 or better and be in good academic standing. Make an advising appointment online through the Biology website: www.lsa.umich.edu/biology.

**What courses should I take first?**
The biological science introductory sequence consists of: BIOLOGY 171, BIOLOGY 172 or 174, and BIOLOGY 173. (Students with an appropriate AP score receive credit for BIOLOGY 195, which is the equivalent of BIO 171 & 172/174, but does NOT grant credit for 173.) Students should take 171 or 172/174 first and then follow with the second lecture course and 173. *(Note that the introductory biology sequence courses cannot be taken pass/fail.)*

### BIOLOGY 171
...focuses on ecology, biodiversity, and genetics and evolutionary processes. Students engage with biological hypotheses dealing with prominent current issues such as human evolutionary origins, emerging diseases, conservation biology, and global change.

### BIOLOGY 172 or 174
*(prerequisite: prior or concurrent credit for CHEM 130)*
...focuses on how cells, organs, and organisms work. (174 covers the same material as 172 but is geared toward students who prefer a more problem-solving approach to understand biology, rather than a more traditional lecture-based course.)

### BIOLOGY 173
*(prerequisite = BIOLOGY 171, 172, 174, or 195)*
...is the accompanying lab component to the introductory sequence. The course provides an integrated introduction to experimental biology. Topics focus on biochemistry, molecular genetics, evolution, and ecology.

**Can I transfer courses from another institution?**
The Program in Biology will review classes taken at other institutions to determine equivalency to University of Michigan Biology, EEB, and MCDB courses. If an external class is determined to be equivalent to a U-M course, it can be posted to your transcript as the U-M Biology, EEB, or MCDB course (with a "T") when you successfully complete the course and **and** the transfer steps listed on the Biology website: [www.lsa.umich.edu/biology/transfercredit](http://www.lsa.umich.edu/biology/transfercredit). [Note: You are welcome to request review of a course before you take it. You will need to provide a detailed syllabus, and must obtain one from the instructor in advance.] **At least 10 of the 15 credits required for a minor must be taken in-residence.**

**See the LSA website for specific policies related to minors:**
http://www.lsa.umich.edu/students/academicsrequirements/lsadegreesrequirements/minors
**BIOLOGY MINOR REQUIREMENTS**

**BIOLOGY MINOR PREREQUISITES:**

<table>
<thead>
<tr>
<th>Introductory Biology Sequence:</th>
<th>TERM</th>
<th>COURSE</th>
<th>GRADE</th>
</tr>
</thead>
<tbody>
<tr>
<td>□ Choose Sequence A or B:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>A: BIO 171, 172 or 174, &amp; 173</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>B: BIO 195 (AP) &amp; 173</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**BIOLOGY MINOR:** Five courses totaling at least 15 credits, distributed as follows:

Core Courses: Select at least two of the four courses listed. (Courses with an asterisk (*) may overlap with the lab requirement.)

- □ Ecology: BIO 281 or EEB 381*
- □ Genetics: BIO 305
- □ Biochemistry: Choose from: MCDB 310, BIOLCHEM 415, or CHEM 351
- □ Evolution: EEB 390, 391, or 392*

Lab or Field Course (This requirement may OVERLAP with other minor reqs.):

- □ Choose one laboratory or field course in BIOLOGY, EEB, or MCDB from the attached list.
  - EEB/MCDB 300 or 400, elected for a min. of 3 credits in one term, may be used to fulfill a lab requirement.
  - (3 credit max. applies; see CONSTRAINTS below.)

Upper-Level Elective (May overlap with the lab requirement.):

- □ Choose one course in EEB or MCDB at the 300- or 400-level
  - EEB/MCDB 301, EEB/MCDB 302, EEB/MCDB 399, EEB/MCDB 499, MCDB 412, and non-specific (departmental) transfer courses are EXCLUDED.
  - EEB/MCDB 300 or 400, elected for a min. of 3 credits in one term, may be used to fulfill this requirement.
  - (3 credit max. applies; see CONSTRAINTS below.)

Additional Course(s):

- □ Choose additional BIOLOGY, EEB, and MCDB elective courses at the 200-level and above, to reach 15 minor credit hours.
  - BIO 241, 262, EEB/MCDB 301, EEB/MCDB 302, EEB/MCDB 800, MCDB 412, and non-specific (departmental) transfer credit are EXCLUDED.

**CONSTRAINTS:**

- Prerequisites, introductory science courses, and non-specific (departmental) transfer courses are EXCLUDED from the 15 cr. required for the minor.
- A maximum of 3 credits of independent research from any combination of BIO 200 and EEB/MCDB 300 or 400 may be counted toward the minor.

**Total Credits and GPA Requirement for Biology Minor:**

- □ Minimum 15 cr. in Minor (minimum of five courses)
- □ Minimum 2.0 GPA in Minor (GPA is calculated from all mandatory prerequisites, all courses used for minor requirements, and all courses in BIOLOGY, EEB, and MCDB.)
