CMB:BME Major Requirements

Program in Biology Student Services
Phone: 734-763-7984
Email: ls-biology-advising@umich.edu
Website: http://www.lsa.umich.edu/biology

Who should major in the 5-year B.S./M.S. Program in CMB:BME?
The curriculum in Cellular and Molecular Biology offers students an integrated program of study and training in the biological and physical sciences. It is a pathway to graduate study in areas of biology and medicine that emphasize a quantitative and analytical approach to the life sciences. The CMB:BME program is designed for students enrolled in the College of Literature, Science and the Arts. The program is jointly administered by the Molecular, Cellular, and Developmental Biology (MCDB) Department (College of LS&A) and the Biomedical Engineering (BME) Department (College of Engineering). A matriculating student will receive the B.S. in Cellular and Molecular Biology (CMB) from the College of LS&A and the M.S. in Biomedical Engineering (BME) from the College of Engineering upon completion of all program requirements.

How do I declare?
Students who wish to declare a major in CMB:BME must complete the following steps:

1. Meet with an advisor in both CMB and BME to discuss the program requirements, your academic and professional goals, and make a tentative course plan.
   - CMB advising appointments are scheduled online through the Program in Biology website: http://www.lsa.umich.edu/biology/
   - BME advising appointments are scheduled online through the Biomedical Engineering website: http://www.bme.umich.edu/programs/sagus/faq.php

2. Complete all prerequisite courses for CMB:BME (see the attached checklist) with a GPA of 3.2 or greater.

3. Meet the minimum GPA requirement. A minimum GPA of 3.2, both overall and in the major, is required. (Note that major GPA consists of all mandatory prerequisites, all courses used for major requirements, and all courses in BIOLOGY, EEB, or MCDB.)

4. Write a 1-2 paragraph personal statement describing your academic and professional goals and how the CMB:BME major will help you achieve them.

5. Complete and submit the CMB:BME program application.

Students will receive email confirmation informing them of the results of their application to the CMB:BME program. Admission to the program requires approval from advisors in both CMB and BME.

Exclusions: Students who elect a major in CMB:BME may not elect the following majors: Biology; General Biology; Cellular and Molecular Biology; Microbiology; Plant Biology; Neuroscience; Biochemistry; or Biomolecular Science. They also may not elect an academic minor in Biology; Plant Biology; Chemistry; or Biochemistry.

M.S. phase: A student may apply to the M.S. phase during the fourth year, when the student has achieved senior standing. At this time, the student must formally apply to the Rackham Graduate School for admission to the M.S. program in Biomedical Engineering. Students with a 3.2 or higher cumulative GPA in the B.S. program in CMB:BME and who are judged by both academic advisors as making timely progress towards the B.S. degree will be admitted to the M.S. phase. Students will be charged graduate tuition for only one academic year. Students are never jointly enrolled in LS&A and Rackham; however, students can begin to take graduate BME courses as undergraduates with the permission of the instructor. Please see the Rackham website for specific policies: http://www.rackham.umich.edu/help/academic_records/sagus_information_for_engineering/.

What courses should I take first?
The biological science introductory sequence consists of: BIOLOGY 171, BIOLOGY 172 or 174, and BIOLOGY 173. (Students with an appropriate AP score receive credit for BIOLOGY 195, which is the equivalent of BIO 171 & 172/174, but does NOT grant credit for 173.) Students should take 171 or 172/174 first and then follow with the second lecture course and 173. (Note that the introductory biology sequence courses cannot be taken pass/fail.)
BIOLOGY 171
...focuses on ecology, biodiversity, and genetics and evolutionary processes. Students engage with biological hypotheses dealing with prominent current issues such as human evolutionary origins, emerging diseases, conservation biology, and global change.

BIOLOGY 172 or 174 (prerequisite: prior or concurrent credit for CHEM 130)
...focuses on how cells, organs, and organisms work. (174 covers the same material as 172 but is geared toward students who prefer a more problem-solving approach to understand biology, rather than a more traditional lecture-based course.)

BIOLOGY 173 (prerequisite = BIOLOGY 171, 172, 174, or 195)
...is the accompanying lab component to the introductory sequence. The course provides an integrated introduction to experimental biology. Topics focus on biochemistry, molecular genetics, evolution, and ecology.

How do I get involved in research?
Independent research is a wonderful opportunity to take an active role in studying what you enjoy! Students participate in a lab, field, or modeling project in which they themselves have a say in the design, implementation, and interpretation of experiments. Please visit the Undergraduate Research web pages for the specific requirements for independent research and advice on how to choose a research area and mentor: http://www.lsa.umich.edu/biology/studentresearch.

What are the requirements for Honors?
The Program in Biology administers an Honors Program to train students to conduct independent research in the biological sciences. Participating in the honors program allows students to develop their research skills, deepen their understanding of the field, and form productive relationships with faculty and other students. The achievement is noted on the diploma and official transcript.

In addition to completing all the requirements for the major, an honors degree requires:
1. a major GPA of at least 3.4, and
2. the completion of a significant piece of independent research that is
3. reported in an honors thesis and
4. presented in a public forum.

For more information, consult the Program in Biology Honors Program information page or a Program in Biology advisor.

Can I transfer courses from another institution?
The Program in Biology will review classes taken at other institutions to determine equivalency to University of Michigan Biology, EEB, and MCDB courses. If an external class is determined to be equivalent to a U-M course, it can be posted to your transcript as the U-M Biology, EEB, or MCDB course (with a "T") when you successfully complete the course and the transfer steps listed on the Biology website: www.lsa.umich.edu/biology/transfercredit. Approved equivalent courses may count toward major requirements, but transfer students are encouraged to meet with a major advisor to develop a major plan. [Note: You are welcome to request review of a course before you take it. You will need to provide a detailed syllabus, and must obtain one from the instructor in advance.]

How can I get involved with student organizations?
There are several student organizations pertinent to biology-related majors. More detailed information is available on the Program in Biology website: www.lsa.umich.edu/biology.

- **Biology Student Alliance (BSA):** intended for Biology, CMB, Microbiology, Plant Biology, Neuroscience, and Biochemistry majors, as well as pre-med or science oriented students interested in learning more about MCDB-related topics. Email BSA-Board@umich.edu for more information.
- **Botany Undergrads Doing Stuff (BUDS):** an extremely informal group of people dedicated to botany. Contact Faculty Advisors Robyn Burnham or Laura Olsen if interested.
- **Neuroscience Students Association (NSA):** an organization for students with an interest in neuroscience. Email nsaleadteam@umich.edu for more information.
- **Society of Biology Students (SBS):** an informal group for students interested in Biology in general. Website: http://www.sitemaker.umich.edu/sbs/home or contact the Faculty Advisor, Robyn Burnham at rburnam@umich.edu for information.
- **Student Society for Stem Cell Research (SSSCR), University of Michigan – Ann Arbor Chapter:** an international network dedicated to the advancement of scientific research for cures. Website: www.umich.edu/~umssscr/index.html. Email ssscrexec@umich.edu.
ADVANCED CMB COURSES
Choose one course from the following list*:

- MCDB 400 Advanced Independent Research**
- MCDB 401 Advanced Topics (appropriate sections)
- MCDB 402 Molecular Biology of Pain and Sensation
- MCDB 403 Molecular and Cell Biology of the Synapse
- MCDB 404 Genetics, Development, and Evolution
- MCDB 405 Molecular Basis of Development
- MCDB 408 Genomic Biology
- MCDB 410 MCDB Capstone
- MCDB 411 Protein Structure and Function
- MCDB 415 Microbial Genetics (formerly MCDB 513)
- MCDB 416 Introduction to Bioinformatics
- MCDB 417 Chromosome Structure & Function
- MCDB 418 Endocrinology
- MCDB 419 Endocrinology Laboratory
- MCDB 421 Topics in Cellular and Molecular Neurobiology
- MCDB 422 Brain Development, Plasticity, and Circuits
- MCDB 423 Research in Cellular and Molecular Neurobiology
- MCDB 425 Biotechnology: From Concepts to Technologies
- MCDB 426 Molecular Endocrinology
- MCDB 430 Plant Molecular Biology
- MCDB 433 Plant Biochemistry
- MCDB 435 Intracellular Trafficking
- MCDB 436 Introductory Immunology
- MCDB 440 Cell Cycle Control and Cancer
- MCDB 441 Cell Biology and Disease
- MCDB 444 Bacterial Cell Biology
- MCDB 448 Telomerase Function in Stem Cells and Cancers
- MCDB 450 Genetics and Molecular Biology of Complex Behavior
- MCDB 453 Ion Channels and their Channelopathies
- MCDB 454 Cell Biology of the Cytoskeleton
- MCDB 455 Cell Biology of Neurodegeneration
- MCDB 456 Genes, Circuits, and Behavior
- MCDB 457 Neurobiology of Sexual and Aggressive Behavior
- MCDB 459 Brain States and Behavior
- MCDB 462 Epigenetics
- MCDB 469 Signal Transduction
- MCDB 471 Advanced Methods in Biochemistry
- MCDB 489 Microbial Genes and Genomes
- MCDB 589 Microbial Evolution

*BIOMEDE 584 is elected in the graduate phase, and does not count toward this requirement.

** Three credits must be completed in one term to meet the Advanced CMB course requirement. A maximum of three credits of independent research (MCDB 400) may count toward the major.

BIOLOGY ELECTIVES
Choose course(s) to reach 51 credits in major:

Any Biology, EEB, or MCDB course at the 200-, 300-, or 400-level (EXCEPT BIO 200, 201, 241, 262; EEB 300, 301, 302; MCDB 300, 301, 302, or 412). An additional Advanced CMB course listed above can be used to meet this requirement.
# CMB:BME Program - Undergraduate Major Requirements

## CMB:BME Program Prerequisites:

- **Introductory Biology Sequence:**
  - [ ] Choose Sequence A or B:
    - A: BIO 171, 172 or 174, & 173
    - B: BIO 195 (AP) & 173

- **Chemistry Sequence:**
  - [ ] CHEM 210 & 211
  - [ ] CHEM 215 & 216

- **Calculus Sequence:**
  - [ ] CALCULUS I: MATH 115, 120 (AP), or 185
  - [ ] CALCULUS II: MATH 116, 121 (AP), 156, or MATH 186

- **Physics Sequence:**
  - [ ] PHYSICS I (lecture + lab): One of the following combinations: PHYSICS 125 & 127; 135 & 136; 140 & 141; or 160 & 161. [PHYSICS 139 (AP) will also fulfill this requirement.]
  - [ ] PHYSICS II (lecture + lab): One of the following combinations: PHYSICS 126 & 128; 235 & 236; 240 & 241; or 260 & 261. [PHYSICS 239 (AP) will also fulfill this requirement.]

## Undergraduate Engineering:

- [ ] Eng 101 or EECS 183

## CMB:BME Program Undergraduate Major:

### Core Courses

- Genetics: BIO 305
- Biochemistry: Choose from: MCDB 310, BIOLCHEM 415, or CHEM 351
- Genetics Laboratory: MCDB 306
- Molecular Biology: MCDB 427
- Cell Biology: MCDB 428 or BIOMEDE 418
- Cell and Molecular Biology Laboratory: MCDB 429

### Advanced CMB Course

- [ ] Choose one course from attached list.

### Biology Elective(s)

- [ ] Choose course(s) from attached list, to reach 47 credits in major.

### Engineering Courses

- [ ] Choose either Series 1 or 2
  1. Chemical Engineering: CHE 230, CHE 330, and CHE 342 or 344
  2. Biomedical Engineering: BIOMEDE 221, BIOMEDE 321, and BIOMEDE 331

### Cognates

- Stats 400, 401, 412, or 425 (min. 3 credits)
- Math 215
- Math 216

## Constraints:

- Prerequisites, introductory science courses, and non-specific (departmental) transfer courses are EXCLUDED from the 47 cr. required for the major.
- A maximum of three credits of independent research (MCDB 400) may count toward the major. Three credits must be completed in one term to meet the Advanced CMB course requirement.

## Total Units and GPA Requirement for CMB:BME

- [ ] Minimum 47 cr. in Major
- [ ] Minimum 3.2 GPA in Major
  - GPA is calculated from all mandatory prerequisites, all courses used for major requirements (including cognates), and all courses in BIOLOGY, EEB, and MCDB.
- [ ] Minimum 3.2 Cumulative GPA is needed for admission to the M.S. program
