Plant Biology Minor Requirements

Why study Biology?
"Pursuing a career in biology can be immensely rewarding and exciting. Studying biology teaches us to ask questions, make observations, evaluate evidence, and solve problems. Biologists learn how living things work, how they interact with one another, and how they evolve. They may study cells under a microscope, insects in a rainforest, viruses that affect human beings, plants in a greenhouse, or lions in the African grasslands. Their work increases our understanding about the natural world in which we live and helps us address issues of personal well-being and worldwide concern, such as environmental depletion, threats to human health, and maintaining viable and abundant food supplies.” [from: http://www.aibs.org/careers]

Who should minor in Plant Biology?
The minor in Plant Biology provides undergraduates with exposure to several areas of science that are essential to an understanding of modern Botany. This program is well-suited for those who wish to study plant biology as part of a liberal arts education, to prepare for a teaching career in secondary schools, as additional breadth for pre-professional students, or for those who simply have an interest in learning about plants. It is not intended to provide preparation for graduate study in basic and applied areas of the plant science and related fields, such as ecology, microbiology, and biochemistry. Exclusions: Students who elect a minor in Plant Biology may not elect the following majors: Biology; General Biology; Plant Biology; Ecology and Evolutionary Biology; Ecology, Evolution, and Biodiversity; Cellular and Molecular Biology; Microbiology; Neuroscience; or Biochemistry. They also may not elect a minor in Biology or Ecology and Evolutionary Biology.

How do I declare?
Students interested in any major or minor in the biological sciences are encouraged to meet with an advisor to discuss their academic plans as soon as possible! Students should have completed the biology introductory sequence with a 2.0 or better and be in good academic standing. Make an advising appointment online through the Biology website: www.lsa.umich.edu/biology.

What courses should I take first?
The biological science introductory sequence consists of: BIOLOGY 171, BIOLOGY 172 or 174, and BIOLOGY 173. (Students with an appropriate AP score receive credit for BIOLOGY 195, which is the equivalent of BIO 171 & 172/174, but does NOT grant credit for 173.) Students should take 171 or 172/174 first and then follow with the second lecture course and 173. (Note that the introductory biology sequence courses cannot be taken pass/fail.)

<table>
<thead>

<th>BIOLOGY 171</th>
<th>BIOLOGY 172 or 174</th>
</tr>
</thead>
<tbody>
<tr>
<td>...focuses on ecology, biodiversity, and genetics and evolutionary processes. Students engage with biological hypotheses dealing with prominent current issues such as human evolutionary origins, emerging diseases, conservation biology, and global change.</td>
<td>(prerequisite: prior or concurrent credit for CHEM 130) ...focuses on how cells, organs, and organisms work. (174 covers the same material as 172 but is geared toward students who prefer a more problem-solving approach to understand biology, rather than a more traditional lecture-based course.)</td>

| (prerequisite = BIOLOGY 171, 172, 174, or 195) ...
| ...is the accompanying lab component to the introductory sequence. The course provides an integrated introduction to experimental biology. Topics focus on biochemistry, molecular genetics, evolution, and ecology. |

Can I transfer courses from another institution?
The Program in Biology will review classes taken at other institutions to determine equivalency to University of Michigan Biology, EEB, and MCDB courses. If an external class is determined to be equivalent to a U-M course, it can be posted to your transcript as the U-M Biology, EEB, or MCDB course (with a "T") when you successfully complete the course and the transfer steps listed on the Biology website: www.lsa.umich.edu/biology/transfercredit. [Note: You are welcome to request review of a course before you take it. You will need to provide a detailed syllabus, and must obtain one from the instructor in advance.] At least 10 of the 15 credits required for a minor must be taken in-residence.

See the LSA website for specific policies related to minors:
http://www.lsa.umich.edu/students/academicsrequirements/lsadegreesrequirements/minors
PLANT BIOLOGY MINOR ELECTIVES: Courses encompassing plant ecology, biodiversity, evolution, structure and development, and physiology. Lab courses are indicated with an asterisk (*).

BIO 230* Introduction to Plant Biology
BIO 255* Plant Diversity
EEB 300* Undergraduate Research (3 credit min./max.)
EEB 372* General Ecology Lab
EEB 400* Advanced Research (3 credit min./max.)
EEB 401 Advanced Topics (applicable sections only)
EEB 412 Molecular Ecology
EEB 420 Plant Evolution
EEB 436* Woody Plants
EEB 455* Ethnobotany (UMBS)
EEB 457* Algae in Freshwater Ecosystems (UMBS)
EEB 459* Systematic Botany
EEB/MCDB 300 or 400 (Independent Research), elected for a minimum of 3 credits in a single term and conducted in a plant biology research lab, may be used to fulfill the lab requirement. (3 credit max. applies; see CONSTRAINTS.)

Any course used to fulfill the Plant Biology Course requirement cannot also be used as an Upper-Level Elective or an Additional Plant Biology Elective; i.e., a course cannot “double-count.”

PLANT BIOLOGY MINOR REQUIREMENTS

PLANT BIOLOGY MINOR PREREQUISITES:

Introductory Biology Sequence:  
□ Choose Sequence A or B:  
A: BIO 171, 172 or 174, & 173  
B: BIO 195 (AP) & 173  

PLANT BIOLOGY MINOR: Courses totaling at least 15 credits, distributed as follows:

Core Courses: Select at least two of the four courses listed.
□ Ecology: BIO 281 or EEB 381  
□ Genetics: BIO 305  
□ Biochemistry: Choose from: MCDB 310, BIOLCHEM 415, or CHEM 351  
□ Evolution: EEB 390, 391, or 392  

Plant Biology Course: (Courses with an asterisk (*) may overlap with the lab requirement)
□ Choose one of the following: BIO 230*, BIO 255*, or MCDB 321  

Upper-Level Elective: (May overlap with the lab requirement)
□ Choose one 300- or 400-level course from the Plant Biology Elective list (see above)  

Lab Requirement: (This requirement may OVERLAP with other major reqs.)
□ Choose one Plant Biology lab course from the Plant Biology Elective list (see above)  
  • Lab courses are indicated with an asterisk (*)  
  • EEB/MCDB 300 or 400 (Independent Research), elected for a minimum of 3 credits in a single term and conducted in a plant biology research lab, may be used to fulfill the lab requirement. (3 credit max. applies; see CONSTRAINTS below.)  

Additional Plant Biology Minor Electives
□ Choose additional Plant Biology minor electives (see above) to reach at least 15 credits in minor.  

CONSTRAINTS:
□ Prerequisites, introductory science courses, and non-specific (departmental) transfer courses are EXCLUDED from the 30 cr. required for the major.  
□ A maximum of 3 credits of independent research (EEB/MCDB 300 or 400) may be counted toward the major.  

Total Units and GPA Requirement for Plant Biology Minor:
□ Minimum 15 cr. in Minor  
□ Minimum 2.0 GPA in Minor (GPA is calculated from all mandatory prerequisites, all courses used for minor requirements, and all courses in BIOLOGY, EEB, and MCDB.)
