

*Coastal Ecosystems and Economic Strategies
at Cerro Azul, Peru:
The Study of a Late Intermediate Kingdom*

edited by Joyce Marcus

Cerro Azul, a pre-Inca fishing community in the Kingdom of Huarco, Peru, stood at the interface between a rich marine ecosystem and an irrigated coastal plain. Under the direction of its noble families, Cerro Azul dried millions of fish for shipment to inland communities, from which it received agricultural products and dried llama meat.

In this richly illustrated volume, a team of paleoethnobotanists and zooarchaeologists analyze the molluscs, crustaceans, fish, birds, mammals, edible and "industrial" plants, and coprolites from Cerro Azul. Making use of recent studies by Peruvian and Chilean ecologists, they reconstruct Cerro Azul's strategies for linking the marine and inland ecosystems.

For a limited time, *Coastal Ecosystems and Economic Strategies at Cerro Azul, Peru: The Study of a Late Intermediate Kingdom* is available at a reduced price of \$30. (List price is \$45.)

[Memoir 59, 8½ × 11 inches; 410 pages;
330 b&w illustrations; 19 color plates]

Sale price: \$30 (List \$45)
