WRITTEN IN BONE
READING THE STORIES OF SKELETONS

AnthrBio 297 - Section 101
Instructor: Abagail Breidenstein

The human skeleton records many aspects of our life, death, growth, and behavior. Evidence from skeletal remains can be used to understand and reconstruct the lives of the dead, such as health and illness, ancestry, diets, or activities. This course will explore the science behind such work and the tools used to interpret modern, ancient, and fossil remains. In addition to being a crash course in osteology, this class will discuss in-depth topics related to the use of skeletons in science and the ethics of human remains. Course material and skills acquired during lab will be fundamental to future work in such fields as medicine, forensics, dentistry, or anthropology. Students will be equipped with the knowledge to read and interpret evidence written on human bones to understand and appreciate the lives of past individuals.

FORECLOSURE!

THE CULTURE OF FINANCIAL COLLAPSE

ANTHRCUL 298

An anthropological investigation of finance and financial collapse in the modern world.
Spring 2018, MW 10-1, Dept. of Anthropology
3 credits
Instructor: Andrew Haxby
Fulfills the Social Science Distribution Requirement
The Ghost in Your Genes: Epigenetics

Anthrbio 297 Section 201 - Summer Term 2018
Mondays & Wednesdays 10am-1pm
Instructor: Ainash Childebayeva

This course will take the students on a journey through the new and very exciting field of Epigenetics!

We will explore the reasons why identical twins are different.

The ways a mother's environment during pregnancy can affect the development of her fetus.

And most excitingly, we will investigate the research on how lifetime experiences can be passed down to future generations.

This course is worth 3 credits. It fulfills the Social Science distribution for non-majors and counts towards Anthropology major and minor.

Please email me at ainash@umich.edu if you have any questions.
Humor allows us to explore unseen, unheard assumptions in social life. What kinds of people we are, the values we share, and the ways we view others are revealed through the study of satire, stand-up, and everyday humor. Fulfills the social science distribution for non-majors.
