Who should major in the 5-year B.S./M.S. Program in CMB:BME?
The curriculum in Cellular and Molecular Biology offers students an integrated program of study and training in the biological and physical sciences. It is a pathway to graduate study in areas of biology and medicine that emphasize a quantitative and analytical approach to the life sciences. The CMB:BME program is designed for students enrolled in the College of Literature, Science and the Arts. The program is jointly administered by the Molecular, Cellular, and Developmental Biology (MCDB) Department (College of LS&A) and the Biomedical Engineering (BME) Department (College of Engineering). A matriculating student will receive the B.S. in Cellular and Molecular Biology (CMB) from the College of LS&A and the M.S. in Biomedical Engineering (BME) from the College of Engineering upon completion of all program requirements.

How do I declare?
Students who wish to declare a major in CMB:BME must complete the following steps:

1. Meet with an advisor in both CMB and BME to discuss the program requirements, your academic and professional goals, and make a tentative course plan.
   - CMB advising appointments are scheduled online through the Program in Biology website: http://www.lsa.umich.edu/biology/
   - BME advising appointments are scheduled online through the Biomedical Engineering website: http://www.bme.umich.edu/programs/sgus/faq.php
2. Complete all prerequisite courses for CMB:BME (see the attached checklist) with a GPA of 3.2 or greater.
3. Meet the minimum GPA requirement. A minimum GPA of 3.2, both overall and in the major, is required. (Note that major GPA consists of all mandatory prerequisites, all courses used for major requirements, and all courses in BIOLOGY, EEB, or MCDB.)
4. Write a 1-2 paragraph personal statement describing your academic and professional goals and how the CMB:BME major will help you achieve them.
5. Complete and submit the CMB:BME program application.

Students will receive email confirmation informing them of the results of their application to the CMB:BME program. Admission to the program requires approval from advisors in both CMB and BME.

Exclusions: Students who elect a major in CMB:BME may not elect the following majors: Biology; Biology, Health, and Society; General Biology; Cellular and Molecular Biology; Microbiology; Plant Biology; Neuroscience; Biochemistry; or Biomolecular Science. They also may not elect an academic minor in Biology; Plant Biology; Chemistry; or Biochemistry.

M.S. phase: A student may apply to the M.S. phase during the fourth year, when the student has achieved senior standing. At this time, the student must formally apply to the Rackham Graduate School for admission to the M.S. program in Biomedical Engineering. Students with a 3.2 or higher cumulative GPA in the B.S. program in CMB:BME and who are judged by both academic advisors as making timely progress towards the B.S. degree will be admitted to the M.S. phase. Students will be charged graduate tuition for only one academic year. Students are never jointly enrolled in LS&A and Rackham; however, students can begin to take graduate BME courses as undergraduates with the permission of the instructor. Please see the Rackham website for specific policies: http://www.rackham.umich.edu/help/academic_records/sugs_information_for_engineering/.

What courses should I take first?
The biological science introductory sequence consists of: BIOLOGY 171, BIOLOGY 172 or 174, and BIOLOGY 173. Students should take 171 or 172/174 first and then follow with the second lecture course and 173. (Note that the introductory biology sequence courses cannot be taken pass/fail.)
   - Students with an appropriate AP/IB score receive credit for BIOLOGY 195, which is the equivalent of BIOLOGY 171 & 172/174, but does NOT grant credit for 173.
   - Transfer students who receive credit for BIOLOGY 191 should take BIOLOGY 192 and BIOLOGY 173 to complete the introductory biology sequence.
**BIOLOGY 171**
...focuses on ecology, biodiversity, and genetics and evolutionary processes. Students engage with biological hypotheses dealing with prominent current issues such as human evolutionary origins, emerging diseases, conservation biology, and global change.

**BIOLOGY 172 or 174 (prerequisite: prior or concurrent credit for CHEM 130)**
...focuses on how cells, organs, and organisms work. (174 covers the same material as 172 but is geared toward students who prefer a more problem-solving approach to understand biology, rather than a more traditional lecture-based course.)

**BIOLOGY 173 (prerequisite = BIOLOGY 171, 172, 174, 191, or 195)**
...is the accompanying lab component to the introductory sequence. The course provides an integrated introduction to experimental biology. Topics focus on biochemistry, molecular genetics, evolution, and ecology.

**How do I get involved in research?**
Independent research is a wonderful opportunity to take an active role in studying what you enjoy! Students participate in a lab, field, or modeling project in which they themselves have a say in the design, implementation, and interpretation of experiments. Please visit the Undergraduate Research web pages for the specific requirements for independent research and advice on how to choose a research area and mentor: [http://www.lsa.umich.edu/biology/studentresearch](http://www.lsa.umich.edu/biology/studentresearch).

**What are the requirements for Honors?**
The Program in Biology administers an Honors Program to train students to conduct independent research in the biological sciences. Participating in the honors program allows students to develop their research skills, deepen their understanding of the field, and form productive relationships with faculty and other students. The achievement is noted on the diploma and official transcript.

In addition to completing all the requirements for the major, an honors degree requires:
1. an overall and major GPA of at least 3.4, and
2. the completion of a significant piece of independent research that is
   - reported in an honors thesis and
   - presented in a public forum.

For more information, including the Honors Program application, visit [lsa.umich.edu/biology/undergraduates/honors-program.html](http://lsa.umich.edu/biology/undergraduates/honors-program.html).

**Can I transfer courses from another institution?**
The Program in Biology will review classes taken at other institutions to determine equivalency to University of Michigan Biology courses. *(Note that 300- and 400-level courses will not be evaluated for equivalent credit.)* If an external class is determined to be equivalent to a U-M course, it can be posted to your transcript as the U-M Biology course (with a “T”) when you successfully complete the course and the transfer steps listed on the Biology website: [www.lsa.umich.edu/biology/transfercredit](http://www.lsa.umich.edu/biology/transfercredit). Approved equivalent courses may count toward major requirements, but transfer students are encouraged to meet with a major advisor to develop a major plan. **At least 20 of the 47 credits required for the CMB:BME major must be taken in-residence.**

[Note: You are welcome to request review of a course before you take it. You will need to provide a detailed syllabus, and must obtain one from the instructor in advance.]

**How can I get involved with student organizations?**
There are several student organizations pertinent to biology-related majors. More detailed information is available on the Program in Biology website: [www.lsa.umich.edu/biology](http://www.lsa.umich.edu/biology).

- **Biology Student Alliance (BSA):** a student org. open to all Program in Biology & Neuro. majors as well as pre-med or other science-oriented students interested in biology research and outreach, and in collaborating and socializing with other biology-interested students. Email bsa-eboard@umich.edu for more information
- **Botany Undergrads Doing Stuff (BUDS):** an extremely informal group of people dedicated to botany. Contact Faculty Advisors Robyn Burnham or Laura Olsen if interested.
- **Michigan Ecology and Evolutionary Biology Society (MEEBS):** The Michigan Ecology and Evolutionary Biology Society (MEEBS) is an informal club designed to create a community for EEB-interested students from any major. Contact faculty advisor Catherine Badgley or check out the MEEBS Facebook page for more information.
- **Neuroscience Students Association (NSA):** an organization for students with an interest in neuroscience. Email nsaleadteam@umich.edu for more information.
ADVANCED CMB COURSES

Choose one course from the following list*:

MCDB 400 Advanced Independent Research**
MCDB 401 Advanced Topics (appropriate sections)
MCDB 402 Molecular Biology of Pain and Sensation
MCDB 403 Molecular and Cell Biology of the Synapse
MCDB 404 Genetics, Development, and Evolution
MCDB 405 Molecular Basis of Development
MCDB 406 Modern Genetic Advances
MCDB 408 Genomic Biology
MCDB 410 MCDB Capstone
MCDB 411 Protein Structure and Function
MCDB 415 Microbial Genetics (formerly MCDB 513)
MCDB 416 Introduction to Bioinformatics
MCDB 417 Chromosome Structure & Function
MCDB 418 Endocrinology
MCDB 419 Endocrinology Laboratory
MCDB 421 Topics in Cellular and Molecular Neurobiology
MCDB 422 Brain Development, Plasticity, and Circuits
MCDB 423 Research in Cellular and Molecular Neurobiology
MCDB 425 Biotechnology: From Concepts to Technologies
MCDB 426 Molecular Endocrinology
MCDB 430 Plant Molecular Biology
MCDB 433 Plant Biochemistry
MCDB 435 Intracellular Trafficking
MCDB 436 Introductory Immunology
MCDB 440 Cell Cycle Control and Cancer
MCDB 441 Cell Biology and Disease
MCDB 444 Bacterial Cell Biology
MCDB 448 Telomerase Function in Stem Cells and Cancers
MCDB 450 Genetics and Molecular Biology of Complex Behavior
MCDB 453 Ion Channels and their Channelopathies
MCDB 454 Cell Biology of the Cytoskeleton
MCDB 455 Cell Biology of Neurodegeneration
MCDB 456 Genes, Circuits, and Behavior
MCDB 457 Neurobiology of Sexual and Aggressive Behavior
MCDB 458 Neuroepigenetics
MCDB 459 Brain States and Behavior
MCDB 462 Epigenetics
MCDB 469 Signal Transduction
MCDB 471 Advanced Methods in Biochemistry
MCDB 489 Microbial Genes and Genomes
MCDB 589 Microbial Evolution

*BIOMEDE 584 is elected in the graduate phase, and does not count toward this requirement.

** Three credits must be completed in one term to meet the Advanced CMB course requirement. A maximum of three credits of independent research (MCDB 400) may count toward the major.

BIOLOGY ELECTIVES

Choose course(s) to reach 47 credits in major:

Any Biology, EEB, or MCDB course at the 200-, 300-, or 400-level (EXCEPT BIO 200, 201, 241; EEB 300, 301, 302; MCDB 300, 301, 302, or 412). An additional Advanced CMB course listed above can be used to meet this requirement.
### CMB:BME Program Undergraduate Major Requirements

#### CMB:BME Program Prerequisites:

**Introductory Biology Sequence:**
- Choose Sequence A, B, or C:
  - A: BIO 171, BIO 172 or 174, & BIO 173
  - B: BIO 195 (AP/IB) & BIO 173
  - C. BIO 191 (transfer credit), BIO 192, & BIO 173

**Chemistry Sequence:**
- CHEM 210 & 211
- CHEM 215 & 216

**Calculus Sequence:**
- CALCULUS I: MATH 115, 120 (AP), or 185
- CALCULUS II: MATH 116, 121 (AP), 156, or MATH 186

**Physics Sequence:**
- PHYSICS I (lecture + lab): One of the following combinations: PHYSICS 125 & 127; 135 & 136; 140 & 141; or 160 & 161. [PHYSICS 139 (AP) will also fulfill this requirement.]
- PHYSICS II (lecture + lab): One of the following combinations: PHYSICS 126 & 128; 235 & 236; 240 & 241; or 260 & 261. [PHYSICS 239 (AP) will also fulfill this requirement.]

**Undergraduate Engineering:**
- Eng 101 or EECS 183

### CMB:BME Program Undergraduate Major:

**Core Courses**
- Genetics: BIO 305
- Biochemistry: Choose from: MCDB 310, BIOLCHEM 415, or CHEM 351
- Genetics Laboratory: MCDB 306
- Molecular Biology: MCDB 427
- Cell Biology: MCDB 428 or BIOMEDE 418
- Cell and Molecular Biology Laboratory: MCDB 429

**Advanced CMB Course**
- Choose one course from attached list.

**Biology Elective(s)**
- Choose course(s) from attached list, to reach 47 credits in major.

**Engineering Courses**
- Choose either Series 1 or 2
  1. Chemical Engineering: CHE 230, CHE 330, and CHE 342 or 344
  2. Biomedical Engineering: BIOMEDE 221, BIOMEDE 321, and BIOMEDE 331

**Cognates**
- Stats 400, 401, 412, or 425 (min. 3 credits)
- Math 215
- Math 216

**Constraints:**
- Prerequisites, introductory science courses, and non-specific (departmental) transfer courses are EXCLUDED from the 47 cr. required for the major.
- A maximum of three credits of independent research (MCDB 400) may count toward the major.
- Three credits must be completed in one term to meet the Advanced CMB course requirement.

### Total Units and GPA Requirement for CMB:BME

- Minimum 47 cr. in Major
- Minimum 3.2 GPA in Major
  GPA is calculated from all mandatory prerequisites, all courses used for major requirements (including cognates), and all courses in BIOLOGY, EEB, and MCDB.
- Minimum 3.2 Cumulative GPA is needed for admission to the M.S. program
