

Solving medical problems.
Training innovators.
Improving healthcare.

Be part of medical entrepreneurship at Michigan!

Do you know about Sling Health? If you don't, you probably should. Sling Health is a national student-run biotech incubator that's helping inspire and support cutting-edge medical technology. Sling Health brings together multi-disciplinary teams from across campus and teaches them the skills and processes needed to invent new biomedical technologies and form companies that will bring those technologies to market. Throughout the year, teams will communicate with expert panels that help teams generate the most efficacious and successful inventions. At the end of the year, teams present their inventions at Innovation Demo Day, competing for admission to national Demo Day where teams pitch to investors and can earn funding. The Michigan Sling Health chapter had a very successful first year in 2017, sending two teams to national Demo Day and bringing home second place! This fall, you can too.

Investigate. Organize. Innovate!

This fall, lead or join a Sling Health innovation team, and be ready to bring to life the next big idea that helps medicine. To learn more, visit michigan.slinghealth.org/getinvolved today and get your application process rolling.

Sling Health: What you should know

- Sling Health uses a problem-centered approach—teams form around clinical problems they want to solve and spend the year developing a solution to that problem
- All teams are cross-functional, bringing together engineers, medical students, law, and business students in small teams
- Each team is provided funding, equipment, and resources to help develop and prototype their ideas
- Sling Health hosts workshops throughout the year to ensure all teams have the knowledge and support they need to be successful
- At the end of the year, teams present their idea at Innovation Demo Day to a panel of judges and compete for the opportunity to travel to nationals in St. Louis, Missouri. Check out Michigan's Innovation Demo Day at michigan.slinghealth.org/demoday.
- At national Demo Day, teams get to pitch their new company to sponsors and investors. Check it out at slinghealth.org/demoday
