Professional Interests and Experience:

Dr. Knute Nadelhoffer is an ecologist who studies plant-soil-atmosphere interactions in temperate forests and arctic tundra. His research combines field-based experiments and modeling studies aimed at predicting ecosystems responses to climate change, air pollution, physical disturbances, and human-ecosystem interactions. Nadelhoffer is a Fellow of the American Association for the Advancement of Science (AAAS), a Fellow of the Ecological Society of America, and a Professor in the Department of Ecology and Evolutionary Biology at the University of Michigan (<http://www.eeb.lsa.umich.edu>).

He received his PhD from the University of Wisconsin-Madison in 1983 and was a post-doctoral research at the Ecosystems Center of Marine Biological Laboratory (Woods Hole, Massachusetts) in 1983-84, and held positions as Assistant, Associate and Senior Scientist at the Ecosystems Center through 2002. He was a Fulbright Research Fellow at the Norwegian Institute of Water Research and the Norwegian Institute of Forest Research (1996-97) and served as Director of the Ecosystem Studies Program at the National Science Foundation (2002-2003). He was President of the Association of Ecosystem Research Centers (2006). He works with the Environmental Law and Policy Center (www.elpc.org) as a Board Member (2010 – present) and Member of ELPC's Science Advisory Council, on which he served as founding Chair (2006-2010).

Dr. Nadelhoffer was a member of the National Network Design Committee of the AIBS project to plan the National Ecological Observatory Network (NEON at www.neoninc.org) and co-chaired the NEON Biogeochemical Cycles subcommittee (2004-2006). He served as an *Expert Reviewer* for (i) the 4th Assessment Report of the Intergovernmental Panel on Climate Change (IPCC Climate Change 2007: Working Group II Report "Impacts, Adaptation and Vulnerability"), (ii) the IPCC Special Report on Climate Change and Land (2019), and (iii) the upcoming IPCC 6th Assessment Report (Working Group I Report, scheduled for release in 2021). He has published over 160 peer-reviewed journal articles, data sets, book chapters, and reports describing ecological processes at local through global scales.
