

Job Title: **Postdoctoral Research Fellow specializing in computational modeling and/or computational linguistics**

Job Rank: Post Doc

Specialty Areas: computational approaches to linguistics, computational linguistics, or phonology

Description:

The Department of Linguistics at the University of Michigan invites applications for a two-year Post-doctoral Research Fellow position, beginning August 28, 2023. We seek exemplary applicants who hold a Ph.D. in Linguistics or a related field who apply computational methods to research in linguistics. Applicants with primary or secondary specialization in computational linguistics and/or phonology are especially encouraged to apply, although we will also strongly consider outstanding applicants in other subfields.

The position, partially endowed by the journal Language Learning, involves teaching two courses per year and continuing an innovative research program. Strong consideration will be given to applicants who can develop and teach introductory and upper level courses to help students learn and apply programming and other computational methods and tools to language.

The dossier should include:

- A letter of application,
- A curriculum vitae,
- Research and teaching statements,
- A statement of commitment to diversity and inclusion,
- Two representative publications or other writings,
- Evidence of teaching excellence, and
- The names and emails of three recommenders who can address the scholarly promise of the research program and the applicant's pedagogical experiences.

To apply, please see the application link provided below.

Review of applications will begin on **March 20, 2023** (open until filled).

Questions about the search should be directed to [lingsearch@umich.edu](mailto:lingsearch@umich.edu)

The University of Michigan is an equal opportunity/affirmative action employer.
