Connect IT.

Let LSA IT help you navigate the complex and evolving landscape of technology at U-M.

When a History & Near Eastern Studies professor was looking for a way to create a visual representation of the triumphs & defeats of the Ottoman Empire, he turned to LSA IT and their Advocacy program. The Advocates in LSA IT will work to understand your project, provide guidance on existing solutions, and advocate for new services. There are times when successful projects require collaboration among many campus groups. Your advocate will facilitate and manage this effort so that you can focus on your research or teaching. For the History & Near Eastern Studies professor, we were able to provide multiple solutions ranging from a traditional map to an online interactive 3-D geospatial tool.

Personal attention to your IT requirements, tailored solutions for your IT needs.
