This document gives a visual guide to the math courses available to undergraduate students. All of the information given here, as well as additional information such as course content and typical student body, can be found in the Program Guide. Some courses have potential routes to them other than those listed here. Students should make an appointment with a Math Advisor to discuss their own situation and determine a plan that is appropriate for them. Adjustments can be read at http://lsa.umich.edu/math/undergraduates/changes.html.
