Work in Progress

Monograph Project

Suárez’s Metaphysics: Medieval and Modern Themes; in preparation, a monograph on various metaphysical themes that emerge from the work of the Spanish Jesuit Francisco Suárez (1548–1617), a leading figure of the so-called “Second Scholasticism”. These themes will be considered in the context of the medieval and early modern scholastic debates that Suárez engaged, and will be related to a critical assessment of the claim that Suárez’s system constitutes “the inflection point between the Middle Ages and Modernity.”
