GLOBAL VIRTUAL INTERNSHIPS

Virtual internships allow students to work for companies around the world—in London, Shanghai, Bangalore, and other cities—without leaving campus. Interns work remotely for about 10 hours per week, unpaid, contributing to important projects in web development, social media, market analysis, and other areas.

HOW CAN YOU RECRUIT A VIRTUAL INTERN?

1 IDENTIFY YOUR NEEDS
What ways can your organization benefit from a remote intern, while providing learning opportunities for students?

2 CREATE A POSITION
Once you’ve selected a project, create a comprehensive job description and a schedule for check-ins. The Hub is here to help.

3 RECRUIT THROUGH THE HUB
We’ll post your position in our network and promote it to students whose studies specifically match your project needs.

WHAT KIND OF IMPACT CAN YOU MAKE?

1 REMOVE BARRIERS
Whether due to costs or family commitments, many students experience barriers that prevent them from interning. Virtual internship opportunities reduce those, making space for important connections and experiences.

2 PROVIDE VITAL EXPERIENCE
LSA students have an ability to make connections among disparate topics and think critically. Virtual internships give them the ability to work independently and apply these unique skills to your industry.

3 CREATE EXPERT COMMUNICATORS
Working remotely requires proficiency in communicating across cultures and time zones. Via phone, FaceTime, and email, virtual interns are gaining intensive training in the art of professional communication.
