UPDATED 1/3/19
WHAT IS IT?

- AMDP will add an additional year to the undergraduate degree program
- It is a terminal Master's in Psychology
- Will work on a focused research project for four semesters (senior year and fifth year) and write a Master's thesis during the 5th year/Master's program
WHY DO AMDP?

- AMDP trains you to do independent research at the Master’s level
- You will take doctoral level courses in psychology
- You will have a strong quantitative training
- Will be a strong applicant for graduate school/research jobs
WHY NOT TO DO AMDP?

- If you do not like research or not thinking of pursuing a research career
- If you want clinical training at the Master’s level
  - AMDP does NOT lead to licensure as a therapist and is not a pathway to a career in counseling!
- If you would like to have a focused applied Master's (e.g., Applied Behavioral Analysis, Organizational Psychology, Counseling Psychology)
- If your mom or significant other tells you to do it
STEPS TOWARDS APPLYING

- Figure out research interests & which area of psychology excites you the most
- Identify potential mentors in your area (next slide)
  - Can work with mentors outside Psych dept. (social work, psychiatry, med school, Ross, etc.) but must have at least ONE mentor/co-mentor who is a Psychology faculty member
  - See “What if my mentor is not in the Psych dept.?” section of Psych website
- Join lab(s) and gain research experience as an undergraduate
- Completing an undergraduate thesis is not required, but recommended
- Can take grad-level courses during senior year (see “Rackham Approved Psych Courses for Graduate Credit” on Psych website)
FINDING A MENTOR

- Find researchers doing work in areas you are interested in – visit the Psych dept. website
- Before you contact them, do your homework!
  - Find their most current articles
  - Do you want to read more?
  - Are you excited by the methods?
- Make initial contact
  - Show you are familiar with their work
  - Ask if there is a role for you on their next project
  - No mass e-mails!
APPLICATION PROCESS

- Begin research by jr. year and discuss possibility of AMDP with faculty mentor by end of jr./early sr. year
  - Must have mentor’s approval/support before applying
- Application deadline: Feb 1. of sr. year to begin in Fall or Winter of upcoming academic year
- Submit application through Rackham:
  - Letter of support from mentor; Academic Statement of Purpose (academic & research plans; career & educational objectives); Plan for completing undergrad and grad courses
You are applying to a sub-area in psychology (e.g., Developmental, Social, Clinical, Personality and Social Contexts)
- Your sub-area is the area in which you are doing research (also, the area your faculty mentor’s research is in)
- Your application will be reviewed by the area admission committee
- Admission is contingent upon a number of factors, such as research fit, academic preparation and feasibility of your project
REQUIREMENTS TO APPLY

- Need 3.2 GPA in major and 3.0 overall LSA GPA
- No GRE required
- Must be enrolled in LSA only (can’t be joint/dual degree), but can be double major
- Research experience and faculty mentor support – must be part of a lab
24 credits total:

- 2 semesters of research (Psych 519, 3 cr/term)
- Stats 613 (4 cr)
- Area core courses (1 each term, 5 cr total min.)
- Cognate (a course outside of your area of Psychology w/in Psych, or a non-Psych course)
- Additional electives as needed to reach 24 credits

Must enroll in at least 9 cr/term
FIRST TERM

- Design project, IRB, data collection, data workshops, meetings with mentor and with AMDP Program Director
- Time commitment ~ 15-20 hours per week
- Aim for data collection to be completed this term
SECOND TERM

- Data analysis and write the thesis!
- Complete rough draft by March 1; final thesis due April 15 after addressing the feedback from the mentor and second reader
- Late April/early May: Graduation Ceremony
WHAT’S INVOLVED IN A THESIS?

- A two semester research project with a faculty mentor
- Hands-on research: laboratory, survey, qualitative, secondary analysis, etc.
- APA format
- Length: about as long as your mentor’s typical manuscripts
  - Can depend on research area norms
  - Anywhere from 25-50+ pages
- Goal: publishable manuscript
- Learning what it takes to be a researcher - a lot of work!
Generally, AMDP is funded by the student 100%

Dept. can nominate students for Rackham Master’s Awards, which fully funds the first semester, and covers the 2nd semester by offering a GSI position (which provides tuition, stipend & healthcare). This is a very competitive award!

- Students cannot nominate themselves for the RMA; they must be nominated by the dept. View the RMA/RMF criteria on Rackham’s website and incorporate how you meet them in your application answers & essays

- AMDP students are not guaranteed GSI positions, but may apply. However, the dept.’s preference is for AMDP students to focus on coursework and research over teaching

- Rackham Research Grant – eligible for up to $1,500 in research funding

- Other funding opportunities through Rackham and external sources
Some projects are already funded by faculty’s grants, but apply for awards anyway!

Support system: Weekly office hours w/ Faculty Director; writing workshops; stats consulting; Psych AMDP Advisor; other AMDP students
