LSA PROGRAM IN SCIENCE, TECHNOLOGY & SOCIETY (STS) MINOR

The goals of the STS minor include:
1. Studying the crucial roles played by social and political forces, choices, and values in shaping the form and content of science, technology, engineering, and medicine.
2. Exploring how the social dynamics of science, technology, engineering, and medicine vary among the world’s cultures, including traditional and non-Western cultures.
3. Developing awareness of the influences of gender, race, and class on science, technology, engineering, and medicine.

Select one of three focus tracks:

- Science & Society
- Medicine & Society
- Technology & Society

The list of approved electives and research seminars is available at myumi.ch/LRG3l
To enroll or discuss the requirements, please schedule an appointment with the STS Director of Undergraduate Studies at myumi.ch/JNmk7

RC TEXT-TO-PERFORMANCE MINOR

The purpose of a “Text-to-Performance” minor is to introduce undergraduates to the complexities of dramatic interpretation - how a text on the page is realized on the stage by actors and directors. It will occupy a position equidistant between the literary study of plays and a theater training in performance.

Students will be introduced to:
- textual analysis
- the interpretive work of director and dramaturge
- the challenges of acting (and designing) stage productions

The list of courses and more information can be found at myumi.ch/aK5mA
For questions, please email Kate Mendeloff at mendelof@umich.edu

All RC minors are open to all U-M undergraduate students. See your academic adviser for more information.
