CARIBOU HUNTING IN THE UPPER GREAT LAKES
ARCHAEOLOGICAL, ETHNOGRAPHIC, AND PALEOENVIRONMENTAL PERSPECTIVES

edited by Elizabeth Sonnenburg, Ashley K. Lemke, and John M. O'Shea

Bringing together American and Canadian scholars of Great Lakes prehistory to provide a holistic picture of caribou hunters, this volume covers such diverse topics as paleoenvironmental reconstruction, ethnographic surveys of hunting features with Native informants in Canada, and underwater archaeological research, and presents a synthetic model of ancient caribou hunters in the Great Lakes region. This book is well suited for anyone with interests in Great Lakes prehistory generally, past environments, or the archaeological discovery of the world’s oldest caribou hunting structures 120 feet below Lake Huron.

[Memoir 57, 8½ x 11 inches; 224 pages; 26 tables; 154 illustrations including 16 color plates]
