

OUTSTANDING RESEARCH MENTOR

TAHRA K. LUTHER, M.S.

**GRADUATE STUDENT, MOLECULAR, CELLULAR,
AND DEVELOPMENTAL BIOLOGY, COLLEGE OF
LITERATURE, SCIENCE, AND THE ARTS**

Dr. Luther was nominated by:
Ashley Pepple and Alicia Kevelin

Dr. Luther is fantastic at providing an atmosphere where I could comfortably ask questions, listen as important discussions took place, and learn as concepts were explained. They gave me the resources that I needed to get a big picture understanding that allowed me the ability to roam more freely as we were carrying out the research. I could always trust that my ideas could be listened to, and that I could participate. I was very lucky to have great mentors that knew exactly the right techniques to use in mentorships and possessed awesome characteristics that allowed me to deepen my understanding on how academic research was carried out.
